◆ *Independent Consultancy & Inspection Service* ◆

J.K. Quality Control Company Profile

Prior to the establishment of J.K. Quality Control, the managing director, Joe Kowal, was employed with the Department of Public Works, NSW for seventeen years as a construction supervisor and inspector of structural steelwork, and industrial protective coatings.

J.K. Quality Control Pty Limited was established in 1991 to provide an independent consultancy & inspection service who specialises on refurbishment of reservoirs throughout Australia.

Over the past 30+ years, J.K. Quality Control has been involved in over 100+ reservoirs for state authorities, regional councils, mines and fuel processing plants. Engagements involved performing following.

- *Perform condition assessments on existing works for proposed remedial coating works.*
- *Structure technical specifications for remedial works, both structural alterations and coating replacement ensuring results meet current strict water contamination requirements.*
- *Perform inspections to ensure that all works performed are in accordance with the requirements of the contract documentation, and contractors QA records.*
- *Submit detailed reports on results of inspection.*

Following is a brief representation of some of the issues where remediation works are required and replacement results.

Bad roof designs and safe access issues

Sever corrosion on roof members or sub-standard light gauge components

Internal coating failure and corrosion pitting

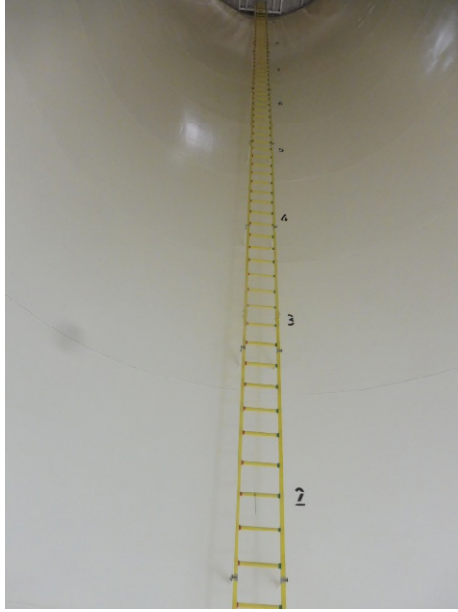

Hazardous or failing external coatings requiring encapsulation for removal

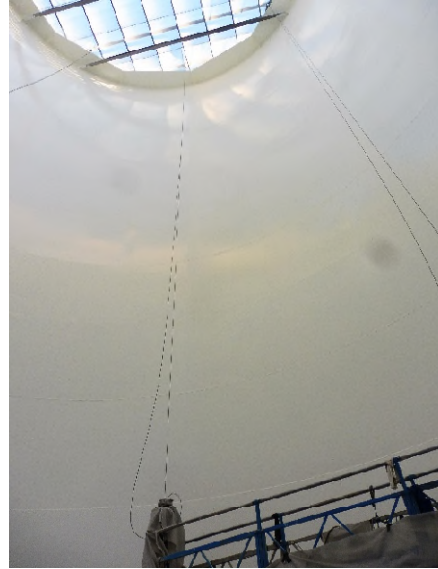

New internal fitments

New internal replacement coating system

New roof & platform designs

Completed overcoating external

The clients of J.K. Quality Control can be assured that technical specification, inspections and reports would meet the requirements of Australian Standards & government bodies. The refurbished reservoir will meet the stringent criteria's of statutory requirements for contamination ingress and have extended long term protection with the new replacement coating systems.

Trusting that the firm of J.K. Quality Control may be of service to you in the very near future.

Joe Kowal
